PREFACE

Dear Reader,

Let us give thanks to the presence of Allah SWT, because
of His blessings and grace we can re-publish the latest
articles in the Journal of Animal Science Volume 23
Number 2 July Edition, Year 2024.

Articles published in the Journal of Animal Science have
been selected and reviewed by the Editorial Team and peer
reviewed by Bebestari Partners who are competent in their
respective fields. Only quality articles can be published in
the Journal of Animal Science.

The topics presented in this edition include: consumer
preference for buying beef; contribution of animal
husbandry sector to a region's income; the influence of
different land transportation time on body condition
response; performance of Padjadjaran quails grower
period feed with different energy and protein levels; the
effect of adding GTG solution in drinking water;
production performance evaluation of grand parent stock
of broiler chicken in Indonesia; edible coating chitosan as
an antimicrobial; the effect of adding chestnut tannin
extracts on ration to performance of NZW rabbit; the use
of various hydrochloric acid concentration levels on the
rabbit bone gelatin quality; differences in characteristics
and income of duck farming; utilization of Kepel
(*Stelechocarpus burahol*) leaf extract as a feed additive; and
factors affecting the reproductive performance efficiency of
beef cattle in the South Sulawesi province, and more.

We express our gratitude to the authors and Bestari
Partners who have contributed to the publication of this
journal edition. We also invite research colleagues and
practitioners in animal agriculture to submit their
manuscripts to be presented in this journal. We welcome
suggestions and constructive criticism from readers and
other parties. Happy reading.
